

Biometric Information

We currently operate a biometric system in the canteen and for registration. We require informed consent from at least one parent to collect and use this information.

Consent given by one parent will be overridden if the other parent objects in writing. Also, if a student objects, we cannot use his/her biometric information for inclusion on the system. Consent can be withdrawn at any time – in writing by parents and verbally by students. We would recommend that you discuss the right to object with your child. When the student leaves the school, or ceases to use the biometric system for any reason, the biometric data will be securely deleted.

The information is used as part of an automated biometric recognition system. This system takes measurements of the student's fingerprint and converts these measurements into a template to be stored on the system. The template is then used to activate the account. An image of the fingerprint is not stored, only an encoded extract.
